PROFILE SUMMARY

I am a Master's graduate in Computer Science specializing in Natural Language Processing. My research explores creative text generation and the evaluation of creativity through quantitative and qualitative methods, particularly in low-resource language settings.

EDUCATION

Master of Science in Computer Engineering - Data Science — Tehran - Iran, 2022 Sep - 2025 Oct

- Tehran Institute for Advanced Studies (Teias), Khatam University (Received Full Scholarship)
- **Thesis Title:** Evaluating the Creativity of LLMs in Persian Literary Text Generation
- **Supervisor** : Dr. Yadollah Yaghoobzadeh
- **GPA: 4.00 / 4.00** (17.91 / 20)

Bachelor of Science in Mechanical Engineering — Karaj - Iran, 2013 Sep - 2019 May

- Islamic Azad University, Karaj Branch
- **GPA**: 2.16 / 4.00 (13.35 / 20)

PUBLICATIONS

- Mohammad Reza Modarres*, **Armin Tourajmehr***, Artin Tavasoli, Yadollah Yaghoobzadeh, and Mohammad Taher Pilehvar. "Every Model Leaves a Trace: Multi-Resolution LLM Fingerprinting." Submitted and under review. (*Equal Contribution) [Paper]
- Mohammad Reza Modarres*, **Armin Tourajmehr***, Yadollah Yaghoobzadeh, and Mohammad Taher Pilehvar. "CLiN: An Objective Framework for Evaluating Creativity as a Product in LLM-generated." In Findings of the Association for Computational Linguistics: EMNLP 2026. (*Equal Contribution) [Paper]
- **Armin Tourajmehr***, Mohammad Reza Modarres*, and Yadollah Yaghoobzadeh. "Evaluating the Creativity of LLMs in Persian Literary Text Generation." In Findings of the Association for Computational Linguistics: EMNLP 2025. (*Equal Contribution) [Paper]

RESEARCH INTERESTS

- Computational Creativity
- Evaluation
- Cultural Considerations
- Multimodal NLP
- Explainable AI

WORK EXPERIENCES

- **Research Assistant – LLM Lab, Khatam University (TEIAS)** — Mar 2025 - Present
  - Collaborated on research evaluating the creativity of large language models by constructing a curated dataset of literary texts and model-generated outputs and conducting empirical analysis using multi-dimensional evaluation frameworks.
  - Contributed to the development of objective frameworks for creativity evaluation, including proposal of proxy metrics and application of human and automatic evaluation methodologies.

- **Teaching Assistant – Khatam University (TEIAS)** Sep 2023 - Feb 2024
  - **Machine Learning Course:**
    - Designed assignments and conducted hands-on session covering classification, regression and clustering using python libraries (NumPy, Pandas, Matplotlib, Scikit-learn, Pytorch)
  - **Applied Data Science Course:**
    - Designed and developed assignments focused on applied machine learning and deep learning, guiding students in practical use of core data science libraries.

SELECTED PROJECTS

- **CLiN: Proxy-Based Evaluation of Creativity in LLM-Generated Texts**
  - Proposed an objective, proxy-based framework for evaluating creativity as a product in LLMs generated texts. Designed interpretable proxies aligned with TTCT dimensions and demonstrated that they achieve more stable and reliable correlations with human judgments than LLM-as-a-judge approaches, particularly for subjective creativity aspects. (September 2025 - Now)

- **Evaluating the Creativity of Large Language Models**
  - A curated dataset of literary texts and model-generated outputs was constructed for creativity analysis. A structured evaluation framework based on multiple creativity dimensions was proposed and applied using human annotations and automatic analysis. The project provides empirical insights into the strengths and limitations of large language models in creative text generation. (August 2024 - May 2025)

- **Classification and Clustering between Artificial and Real Images**
  - Implemented supervised image classification and unsupervised image clustering to analyze visual data using learned feature representations. (February 2023 - June 2023)

SKILLS

- **Programming Languages**
  - Python, Bash, HTML, CSS, SQL
- **Database System**
  - MySQL, SQLite, PostgreSQL
- **Development Tools and Software**
  - Git, Github, Microsoft Office, Latex

ATTENDED CONFERENCES & WORKSHOPS

- **EMNLP Conference, Suzhou, China** Nov - 2025
  - Accepted paper presented as a poster
- The Second Symposium on Frontiers in Computer & Data Sciences (Khatam University) Feb - 2024
- Advanced Topics in Optimization for Machine Learning and Beyond (Khatam University) Jan - 2024
- Frontiers in Computer and Data Sciences (Khatam University) Apr - 2023

LANGUAGES

- Persian - Native
- English: IELTS Academic (October 2026) — Overall: 7.0 (Listening: 8.0, Reading: 7.0, Speaking: 7.0, Writing: 6.0)
